INTRODUCTION

The present Training Apps for learning assessment document has been developed as part of the Erasmus+ project 'Transversal Model for Migrants' with the contribution of all partners involved in the project. 'Transversal Model for Migrants' is an Erasmus+ Project, which emerges from a current European context characterized by a strong inequity between the average economic and social situation of workers in Europe and the one of EU migrants, who often have less rewarding job positions, lower wages, fewer opportunities for career development, and fewer opportunities to get a better job position (transversal mobility). At the same time, trainers, coaches, VET educators and social workers, who are supporting migrants within the EU lack the tools to support their beneficiaries in the field of transversal competences. The project will produce a new operating framework dedicated to trainers, coaches, career counsellors, VET educators and social workers, in order to promote higher job position, entrepreneurship spirit, and economic and social integration within Europe for migrants.

The chosen following Training Apps have the purpose of assessing the learning on transversal competences for both groups, professionals in migration sector (trainers) and migrant workers.

Both will have the possibility to use their mobile devices to complete different quizzes elaborated for the aforementioned purpose.

TRAINING APPS FOR LEARNING ASSESSEMENT

FormsApp is a free application that allows to create a form for survey and to share forms already created with Google forms.

Google Forms is a free tool from Google that allows you to do the following:

- Create forms, surveys, quizzes, and such
- Share the forms with others
- Allow others to complete the forms online
- Collect all the responses in a spreadsheet
- Provide you with helpful summaries of the collected data with charts and graphs

The access to Google Forms is possible through the Google Drive screen or the Google Forms web app.

To create a quiz, trainers can use their personal Google account.

Following there is the link with instructions on how to create and grade quizzes with Google Forms:

<https://support.google.com/docs/answer/7032287?hl=en>

When creating a quiz with Google Forms, there are different options to send it:

- By email
- By using a link
- By inserting HTML on a website or document.

When using a link, professionals and workers will have the possibility to access from their mobile devices without the need of having a Google account.

Participants can see the summary of their answers to the quiz, the correct answers and punctuation in the exercise according with the right answers; therefore they can self-assess their learning.

FormsApp allows to share the quizzes via email, whatsapp, facebook, twitter and message.

The recipients will have the possibility to access to the quiz with his/her mobile device by using FomsApp (in case s/he has installed) or through the web navigator.

OTHER TRAINING APPS FOR TRAINERS

Following there are suggested other training apps for trainers to assess their students' learning.

Kahoot

- It is a game-based learning platform that makes it easy to create, share and play learning games or trivia quizzes in minutes.
- It allows to evaluate students AT REAL TIME.
- You can access to www.kahoot.com , register yourself and create New Kahoot.
- Different types: quiz, survey, jumble and discussion.
- It possible to share the questionnaires by sharing a playable link, that automatically is generated when creating the questionnaires.
- Two devices are needed.
- Explanatory video: <https://www.youtube.com/watch?v=7XzfWHdDS9Q>

Mentimeter.

- It is a easy-to-use software for educators and speakers to engage audience AT REAL TIME.
- It allows audience participates in interactive presentations.
- Link: www.mentimeter.com
- It is possible to manage the presentations from the smartphone by accesing to Mentimote.
